

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (currently amended): An applicator with sealed fluid comprising:

an elongated housing with a first sealed end and a second open end;

one or more substances enclosed within one or more capsules disposed within said elongated housing near said first sealed end;

a hollow tube with a first open end and a second open end and with a sharp point capable of puncturing the capsule provided at said first end; and

an applicator tip affixed to said second open end of said hollow tube;

wherein when the second open end of the hollow tube is inserted into the elongated housing, it will puncture the capsule thereby releasing the substance in the capsule and forcing the substance into the applicator tip through the hollow tube due to the displacement of the volume in the elongated housing by the inserted hollow tube.

Claim 2 (original): An applicator with sealed fluid as in claim 1, wherein said capsule is made of aluminum foil or plastic.

Claim 3 (original): An applicator with sealed fluid as in claims 1 or 2, wherein said substance is a cream, a lotion, a medication, or a cosmetic.

Claim 4 (currently amended): An applicator with sealed fluid comprising:

an elongated housing with a first sealed end and a second open end;

a protrusion with a sharp point is provided near said first sealed end;  
one or more substances enclosed within one or more capsules disposed within  
said elongated housing near said protrusion with a sharp point;  
a hollow tube with a first open end and a second open end; and  
an applicator tip affixed to said first open end of said hollow tube;  
wherein when the second open end of the hollow tube is inserted into the  
elongated housing, it will urge the capsule against the sharp point and rupture the capsule thereby  
releasing the substance in the capsule and forcing the substance into the applicator tip through  
the hollow tube due to the displacement of the volume in the elongated housing by the inserted  
hollow tube.

Claim 5 (original): An applicator with sealed fluid as in claim 4, wherein said capsule is made of  
aluminum foil or plastic.

Claim 6 (original): An applicator with sealed fluid as in claims 4 or 5, wherein said substance is  
a cream, a lotion, a medication, or a cosmetic.

Claim 7 (currently amended): An applicator with sealed fluid comprising:

an elongated housing with a first sealed end and a second open end;  
one or more substances enclosed within one or more capsules disposed within  
said elongated housing near said first sealed end; and  
a hollow tube with a first open end and a second open end with an applicator tip  
affixed to said first open end of said hollow tube;  
wherein when said second open end of the hollow tube is inserted into the  
elongated housing, it will rupture the capsule thereby releasing the substance in the capsule and

forcing the substance into the applicator tip through the hollow tube due to the displacement of the volume in the elongated housing by the inserted hollow tube.

Claim 8 (original): An applicator with sealed fluid as in claim 7, wherein said capsule is made of aluminum foil or plastic.

Claim 9 (original): An applicator with sealed fluid as in claims 7 or 8, wherein said substance is a cream, a lotion, a medication, or a cosmetic.
